New Vascular Consulting Suites & Vascular Ultrasound Laboratory

located beside Westmead Private Hospital

We are pleased to announce that Westmead Specialist Vascular Services (WSVS) has opened a new state-of-the-art clinic in Westmead. WSVS is located next to Westmead Private Hospital and is only minutes from Westmead Public Hospital, where all our specialists have public appointments. Each of the vascular surgeons have many years' experience, with national and international reputations in the management of vascular disorders, as well as a long and continuing track record at both Westmead Public and Westmead private hospitals.

WSVS four Vascular and Endovascular Surgeons have extensive experience in treating the full spectrum of vascular conditions including:

- Varicose veins
- Mesenteric ischemia
- Carotid artery disease
- Deep venous thrombosis & treatment
- Thoracic outlet syndrome
- Lower limb ulceration
- Acute & chronic arterial disease
- Aortic disease
- Lymphoedema
- Diabetic feet & ulcerations
- Hyperhidrosis

The team is dedicated to providing patients with the best possible outcomes through exceptional medical and surgical care, with the ability to diagnose, investigate and manage patients with the full spectrum of vascular disorders with endovascular (arterial and venous) therapies.

GPs and specialists can refer directly to WSVS and to their vascular ultrasound lab offering patients easy access to vascular investigations. As part of an ongoing service this group will continue to offer a vascular ultrasound to inpatients at Westmead Private Hospital.

WSVS offers two consulting suites, a large treatment room, treadmill room and attached to the clinic is a dedicated Vascular Lab that features state of the art diagnostic vascular ultrasound where the team performs non-invasive testing using Doppler ultrasound techniques on-site. All medical practitioners are able to access this service with the vast majority of all our referred scans being available bulk billed or no gap.

Scanning services include routine and urgent:

- Venous scans, including varicose veins,
- Arterial scans including both lower and upper limbs, aortic, carotid mesenteric scans
- DVT and all manner of thrombotic disorders
- Diagnostic pressure studies, ABIs

The Clinic is open Monday to Friday from 8.30am to 4.00pm.

Dr Tom Daly
FRACS, DDU

Dr Tae Hyun Cho
MBBS BSc, FRACS

A/Prof Irwin Mohan

Dr Tae Hyun Cho

MBBS BSc, FRACS

Dr Cho's main interests include minimally invasive aortic surgery and he is currently a Proctor for Medtronic for their aortic stent grafts in Australia and Asia. He is involved with a large multidisciplinary ulcer / high risk foot clinic in Westmead where over 800 patients are seen every year. Dr Cho is also involved with up to date surveillance and endovascular maintenance of dialysis access, successfully preventing unnecessary placement of dialysis catheters.

Dr Tom Daly

FRACS, DDU

Dr Daly specialises in all aspects of arterial and venous surgery both open and endovascular. He has a special interest in endovascular treatments for peripheral arterial diseases as well as aneurysmal disease. He is involved in clinics for the management of diabetic and venous ulcerations as well as holding appointments at both Westmead, Blacktown and Norwest Hospitals. He is a conjoint lecturer at both the University of Sydney and Western Sydney University.

A/Prof Irwin Mohan

MBBS, MD, FRCS, FEBVS, FRACS

Associate Professor Irwin Mohan's clinical and academic interests are in the endovascular treatment of aneurysmal and occlusive arterial disease, lower limb revascularisation (for claudication and critical ischaemia), aortic and popliteal aneurysms treatment with open surgical and endovascular technique, carotid artery disease and varicose veins using open surgical and laser (EVLT) techniques and including ultrasound guided sclerotherapy. He also has an interest in the medical management of peripheral arterial disease and Diabetic limb ischaemia.

Dr Mauro Vicaretti

PhD, FRACS

Dr Vicaretti specialises in all areas of vascular disease and their treatment with special interests in endovascular therapies for arterial and venous disease, vascular biology and the management of the diabetic foot.
